

Have A Coke?

In many states the highway patrol carries two gallons of Coke in the trunk to remove blood from the highway after a car accident.

You can put a T-bone steak in a bowl of Coke and it will be gone in two days.

To remove rust spots from chrome car bumpers: Rub the bumper with a rumped up piece of Reynolds wrap aluminum foil dipped in Coca-Cola.

To remove grease from clothes: empty a can of Coke into the load of greasy clothes add detergent and run through a regular cycle.

To clean corrosion from car battery terminals pour a can of Coke over the terminals to bubble away the corrosion.

The active ingredient in Coke is phosphoric acid. It will dissolve a nail in about four days. Phosphoric acid also leaches calcium from bones and is a major contributor to the rising increase of osteoporosis.

The distributors of Coke have been using it to clean engines of their trucks for about 20 years.
